About Homework

Homework is a set of tasks assigned to students by their teachers to be completed outside of regular class time. These tasks are intended to reinforce learning and help students practice skills they have learned in class. Homework can include reading assignments, writing assignments, math problems, research projects, and other types of activities. The amount and type of homework assigned can vary greatly depending on the teacher and the subject being taught.

Homework Module Workflow: Teachers can create homework for their Class-Section after creating homework teachers can evaluate homework for class-section students that who completed homework or who did not.

Homework List, you can see Upcoming Homework tab and Closed Homework tab.

In Upcoming Homework, You can view upcoming homework whose date would be current date and whose submission date is determined by the teacher when he wants to keep the submission date. These homework would be show in upcoming homework.

In closed homework, you can view those homework, whose present date and submission date has been passed out, submission date means as If student fails to meet the submission deadline and the homework due date has been passed, the homework would displayed in closed homework and another condition, if teacher does not keep submission date and homework present date has been passed so homework would be show in closed homework.

How to add Homework?

To add homework, go to Homework > Add Homework then click on Add button present at right side in homework list page, at click of this button a model will open, here select the Class, Section, Subject Group, Subject and enter Homework Date, Submission Date and you can see there is a tab for maximum marks, Attach Document (if you want to attach any file) and Description and then click on Save button. You can view this added record in Homework List page.

Now, search the homework that you recently saved. Go to "Homework" > "Add Homework," enter the class, section, subject group, and subject, and then click the "Save" button. The homework that you recently saved will show up in your Upcoming Homework. Now click on the "evaluation" icon, which is showing in the Action column.

And the "evaluation homework model" will be open. You can see the maximum marks in the evaluation model that you set when you created this homework here.

If you do not fill in the Maximum Marks at the time of creating homework, in the Evaluation Homework modal, there will be a blank in place of the Maximum Marks.
